

Elcometer 2215 Lory Viscosity Cup

The Elcometer 2215 Lory Viscosity Cup is a conventional cylindrical cup with a needle fixed into the bottom for quick measurements on-site or during production.

The cup is first dipped into the product to be measured, which then empties through the escape hole. Unlike other Viscosity cups, the flow time is measured as soon as the point of the needle appears.

Technical Specification

Part Number	Description	Cup Number	Range (cSt) ¹
K0002215M001	Elcometer 2215 Lory Viscosity Cup	1	50 - 1100
