Elcometer 4800 & 4900 Vacuum Tables

## Elcometer 4800 & 4900 Vacuum Tables

Elcometer offer a wide range of vacuum tables to provide an ideal surface for manual application of films on test charts and samples. Available in two formats:

- The Elcometer 4800 Series - these aluminium tables, with a channel around the edge, hold thin, flexible test pieces e.g. test charts, plastic film and paper absolutely flat.
- The Elcometer 4900 Series - made of perforated aluminium, keep a wider range of test pieces absolutely flat, including: glass, plastic sheets, contrast charts etc.

## Film Application & Test Charts

For numerous products such as paint, ink, varnishes, glue and cosmetics, the reliability of many laboratory tests is directly related to the quality of the samples prepared from it.

It is absolutely essential that any measurements made on such coatings, whether for the purpose of describing their appearance or their physical properties (colour, gloss, hiding power, drying time, etc), are made on the basis of uniform and comparable samples with precisely controlled thickness.

In order to meet such specific demands, Elcometer has a wide range of high quality, high precision film applicators and motorised film applicators for greater repeatability and reproducibility when undertaking a large number of sample tests.

Elcometer also offer a wide range of Leneta Test Charts – the market standard – to meet all your specific requirements

### At a glance

- Wide range of tables for use with thick or thin substrates
- Can be supplied with thermostatic control or heating

Model	Description	Effective Dimensions		Part Number
		cm	inches	
Elcometer 4800/1	Channelled Vacuum Table	14.5 x 25	6 x 10	K0004800M001
